Who we are:

M&M Software develops technologically advanced applications and products for industrial automation. Our portfolio includes consulting, development, services and tools for factory and process automation and our core strengths are in device integration, engineering systems, human-machine interfaces and Web applications.

Our success derives from almost 25 years' experience in the target industries and exceptional technological know-how. Strong process orientation and trendsetting management of intellectual capital guarantee our software solutions are of the highest quality.

In St. Georgen (Germany) and Suzhou (China) we develop innovative and state-of-the-art solutions for the international market. The sustained success of our customers is always our main concern.

What we offer:

Our staff values the quick decision-making, the highly process-driven performance output and the attractive working environment. Our solid growth and a clear strategic orientation promote the individual seizing of opportunities and allow the personal creative freedom.
